# Proofminder
Leaf-level Farming Platform

Valuable data + timely actions = higher yield with same or less resources

- Receive time-sensitive insights about every cm² of the field
- Reduce the amount of resources and chemicals used by up to 70%
- Get better yield and achieve your production goals sustainably

Use cases – high-impact scenarios to solve Agroindustry problems

Plant Stress Analysis

Canopy Analysis

Flowering Detection

Weather Damage Analysis

Wildlife Damage Analysis

Crop Monito-ring

Plantation monitoring

Stand Count

Weed Detection

Proof-minder

Water-logging

Plant Disease Detection

Missed Tassels Detection

Increase productivity throughout the season

PROOFMINDER HELPS GROWERS TO SWITCH FOCUS FROM PLOTS TO PLANTS AND MEET PRODUCTION GOALS WITH FINITE RESOURCES

"Our platform provides micro-level actionable insights on every leaf and plant so growers can estimate, calculate and improve all that's visible on the field across the season." **Norbert Havas, CTO**

One Platform - unlimited use cases

Numerous high-ROI use cases ready to deploy. Quick innovation cycle to build new AI Models in days and scale to 1000+ ha in the same season

PRECISE PLANT STAND COUNT ANALYSIS

WEED DETECTION & SPOT SPRAYING MAPS

MISSED TASSELS DETECTION

YIELD ASSESSMENT

CROP MONITORING & YIELD FORECAST

JOINT INNOVATIONS

AI-powered actionable reports for

Field crops • Vegetables • Vineyards • Horticulture • Forests
