

ECO-FRIENDLY DISINFECTION

made simple and effective

ECO-FRIENDLY DISINFECTION

made simple and effective

You can check out our
introduction video here:

OUR PRODUCT

Introducing our **innovative disinfection device**, which locally produces an effective and eco-friendly disinfectant **using only salt, water, and electricity**.

We offer a complete solution, from manufacturing to installation, operation, and maintenance, all supported by a remote monitoring system.

WHY?

Why choose us?

The era of traditional, hazardous, and less effective disinfectants is over.

Our system provides not only a safer but also a more efficient disinfection solution for **drinking and utility water systems, surfaces, and previously unresolved areas**.

Effective and safe
Biocidal, yet **not classified as a hazardous substance**

Automated operation
only requires regular salt replenishment

Remote monitoring
easily integrates with existing systems

Cost-efficient operation
affordable investment and maintenance costs

Biofilm removal without corrosion
long-lasting protection without damaging surfaces
